# Erisan Oxy+ HYGIENIC LAUNDRY

Normal machine washing is not always enough when cleaning textiles. In some situations, such as in the case of viral infections, it is necessary to ensure an adequate level of hygiene in the laundry. In health care this can be assured by using a separate CE-marked Erisan Oxy+ disinfectant. In this case, dose only half of the recommended dosage of the textile detergent.

The effect of Erisan Oxy+ disinfectant activates already in mild temperatures and thanks to that, hygienic laundry is achieved also at 40-60 ° C in normal length washing programs.

## BEFORE

- ✓ **Pay attention to hand hygiene,** protect your hands and clothing
- ✓ **Sort:** wash similar textiles together, microfiber textiles always in their own machine
- ✓ **No overfilling**
- ✓ **5 kg laundry:** 1 bag of Erisan Oxy+ -disinfectant and half of the recommended dosage of detergent in use (may mix in the wash ball or dispenser)
- ✓ **Use a normal length** 40°C - 60°C washing program

## AFTER

- ✓ **Protect clean laundry** by disinfecting the front, the door and the seals of the washing machine before removing laundry (with a 2% Erisan Oxy+ dilution)
- ✓ **Work with disinfected hands**
- ✓ **Handle microfiber textiles** with protective gloves to prevent your hands from drying
